

REMARKS

In the application claims 1-20 remain pending. Claims 21-35, drawn to a non-elected species, have been canceled without prejudice and will be pursued in a Divisional Application. Presently, claims 7-14 have been indicated to contain allowable subject matter while claims 1-6 and 15-19 have been rejected as being obvious over Worthy (U.S. Patent No. 6,684,054) in view of Root (U.S. Patent No. 6,013,007) in further view of Worthy (U.S. Patent No. 5,749,043). The reconsideration of this rejection is, however, respectfully requested.

As acknowledged in the Office Action, the cited references, whether considered alone or in combination, fail to disclose, teach, or suggest producing statistics based upon received radio parameter information, received position information, and time information. For at least this reason, claims 7-14 were deemed to be patentable over the cited references. It is respectfully submitted that the same claim elements are set forth in originally filed claims 15-19 and, for this reason, claims 15-19 should also be deemed to be patentable over the cited references. As for claims 1-6, the Applicants have amended these claims to also recite producing statistics based upon received radio parameter information, received position information, and time information, support for which is found in the specification, figures, and claims as originally filed. Accordingly, it is respectfully submitted that amended claims 1-6 should likewise be deemed to be patentable over the cited references. For these reasons, it is respectfully requested that the rejection of the claims be withdrawn..

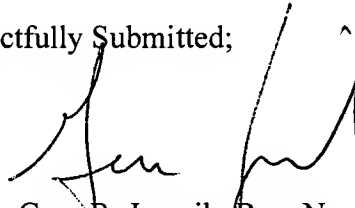

Believing that the claims are allowable and, therefore, for the sake of brevity, no further arguments have been presented concerning the merits of the rejection of the claims. This, however, is not to be construed as meaning that the Applicants have acquiesced as to the merits of the rejection of the claims. Rather, the Applicants reserve the right to argue the merits of the rejection of the claims should the need arise in the future.

CONCLUSION

It is respectfully submitted that the application is in good and proper form for allowance. Such action of the part of the Examiner is respectfully requested. Should it be determined, however, that a telephone conference would expedite the prosecution of the subject application, the Examiner is respectfully requested to contact the attorney undersigned.

The Commissioner is authorized to charge any fee deficiency or credit overpayment to deposit account 50-2428 in the name of Greenberg Traurig.

Respectfully Submitted;

Date: December 2, 2004
